

Dear Advertiser

Thank you for promoting your social media on our web pages via our Friends2Follow app.

Facebook recently changed the rules for how this works, so we need you to authorize our Friends2Follow app to pull your posts from Facebook to display them on our website.

This document will walk you through the steps needed to insure all your Facebook posts reach our audience.

Thanks for your business.

STEP 1

****PLEASE NOTE**** This process requires someone who can login to your Business Facebook Page, if that is *not* you, please forward Emails or Direct us to an appropriate person.

You will receive an email, inviting you to create a Password for connecting and viewing info about your social media engagement through our website. Click the link to get started.

←OR→

You will receive a pre-set user name and password directly from us with a URL to visit and get started. Visit the URL we will call or email to get this authorization done.

Important Update

You are receiving this email because you are a valued client of Friends2Follow. Facebook & Instagram now require your authorization for us to promote the posts from your Business Facebook Page on our website. Providing authorization for your Business Facebook Page is simple. Follow the instructions in the link below to keep fresh Facebook posts flowing for our readers.

<https://friends2follow.com/facebook-instructions.pdf>

Once you have read the instructions, click on the one-time login link below to begin the process or forward this email to anyone with access to your Business Facebook Page.

An important note, although you access your Business Facebook Page through a personal Facebook login, we do NOT have access to and NEVER use any information from your personal page or modify anything within your Facebook account(s). We only pull the Posts from your public Business Facebook Page and put them in front of our audience.
